PROFESSIONAL EXPERIENCE

Backend Specialist & Mobile Developer — *Ministry of Trade of the Republic of Indonesia (Kemendag)* **Nov 2024 – Jun 2026**

- Developed and maintained web and mobile applications supporting the Ministry of Trade's digital services.
- Built features for e-Kemendag Mobile (Flutter super app), the Trade Barriers Database, and the Export-Import Information System.
- Designed and integrated REST APIs for reliable data exchange between web, mobile, and backend services.

Full-Stack Developer — *Surabaya State University (UNESA)* **Oct 2023 – Oct 2024**

- Developed SIMBAJANESA, the university's e-procurement system for goods and services.
- Built the backend, frontend, and REST API with Laravel, Vue.js, and MySQL.
- Worked with stakeholders to analyse requirements and translate business processes into features.

Software Engineer — *PT Salva Teknologi Digital* **Sep 2022 – Sep 2023**

- Developed web and mobile enterprise applications for healthcare, ERP, and business digitalisation.
- Delivered new features, maintained production systems, and improved application stability.
- Improved performance and code quality by fixing bugs and refactoring critical modules.

Backend Developer — *PT Invesnow Principal Optima* **Aug 2021 – Aug 2022**

- Developed the backend and REST API for Invesnow, an OJK-licensed mutual fund investment platform, using Laravel.
- Built a CMS to manage investment products, investor data, and transactions.
- Optimised database queries to improve application performance.

Full-Stack Web & Mobile Developer — *PT Phicos Cipta Media* **Jul 2020 – Jul 2021**

- Developed web and mobile applications for client businesses using Laravel, CodeIgniter, and Flutter.
- Built REST APIs to integrate web, mobile, and backend applications.
- Collaborated with UI/UX and QA teams to deliver features that met user requirements.

Full-Stack Web Developer — *CV Solusi Global Servisindo* **Jun 2019 – Jun 2020**

- Developed web applications with Laravel, CodeIgniter, PHP, and MySQL based on client requirements.
- Built custom WordPress themes and plugins.
- Built REST APIs for data integration between backend and frontend.

SELECTED PROJECTS

e-Kemendag Mobile — Government super app (Flutter, REST API): single entry point for Ministry of Trade staff attendance and internal applications; published on the App Store and Google Play.

Invesnow — Investment platform (Laravel, Vue/Nuxt): backend API and CMS for mutual fund and stock investment, products, investors, and transactions.

Wezata — Travel booking ecosystem (Go, Flutter, Svelte): booking website plus mobile apps for booking, agent sales, and ticket redemption.

DashAI EKPKD — AI assistant for the Ministry of Home Affairs (Nuxt.js, NestJS): question answering and data analysis with user, regional admin, and agency admin roles.

Mom's Journey — Maternal and child health app (Flutter) for Brawijaya Hospital: pregnancy and child growth monitoring.

Zhafirah Umroh — Umrah & Hajj management system (Flutter, PHP): packages, registrations, transactions, and marketing.
